

Steampunk

Spaceship project

The background of the slide is a detailed, atmospheric illustration of a steampunk-style interior. It features a complex arrangement of brass gears, pipes, and machinery. The lighting is warm and golden, emanating from various sources, creating a sense of depth and texture. The overall aesthetic is reminiscent of a workshop or a control room from a classic science fiction or fantasy setting.

Bookshelf

This is a large bookshelf composed of a group of bookshelves, even requiring a small ladder to reach the highest point. It retains the basis of the wooden structure of the European traditional bookshelf, and adds steampunk elements, making it full of mystery.

Jaichen Ding

Pool

This is an industrial-style pool. In addition to the main model, I added some water pipes and wires to present a steampunk mechanical style. I will mainly use a rusty metal texture and brown tone as the material.

Chieh-Hsi Ma

Wine

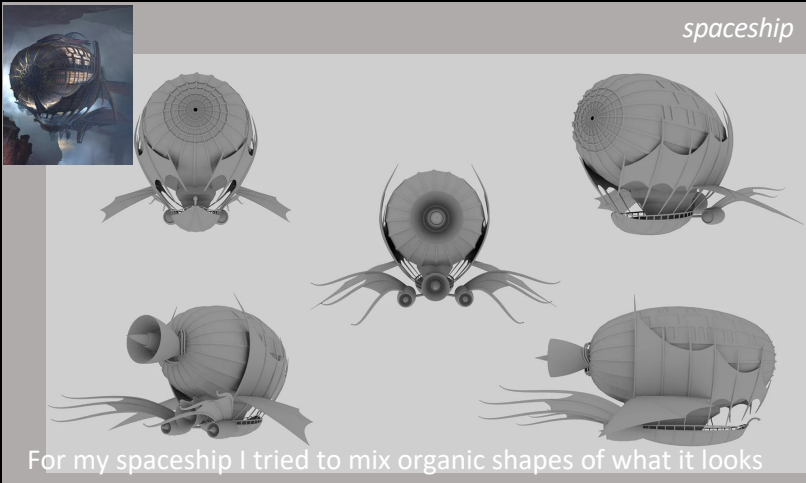

Shiqi Ma

This is a group of modeling about wine, including wine bottles, wine glass, and wine racks. Steampunk elements are added to the style, and the wine bottle and wine glass are modified to the style of whiskey in the discussion.

suitcase

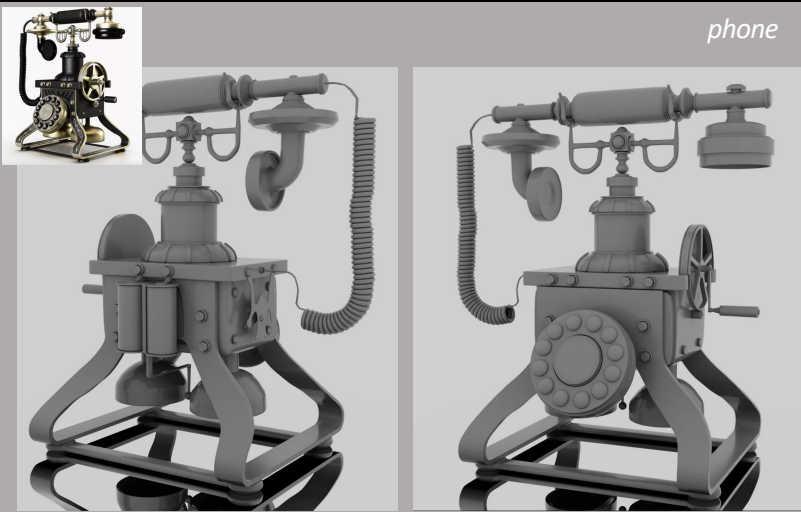

Zhiqian Huang

spaceship

For my spaceship I tried to mix organic shapes of what it looks like fish fins as the wings of the spaceship, and an outer structure that surrounds part of the main body. Originally, I only added two back engines but then I decided to add two more additional engines on the sides along with two more wings to make the design more interesting.

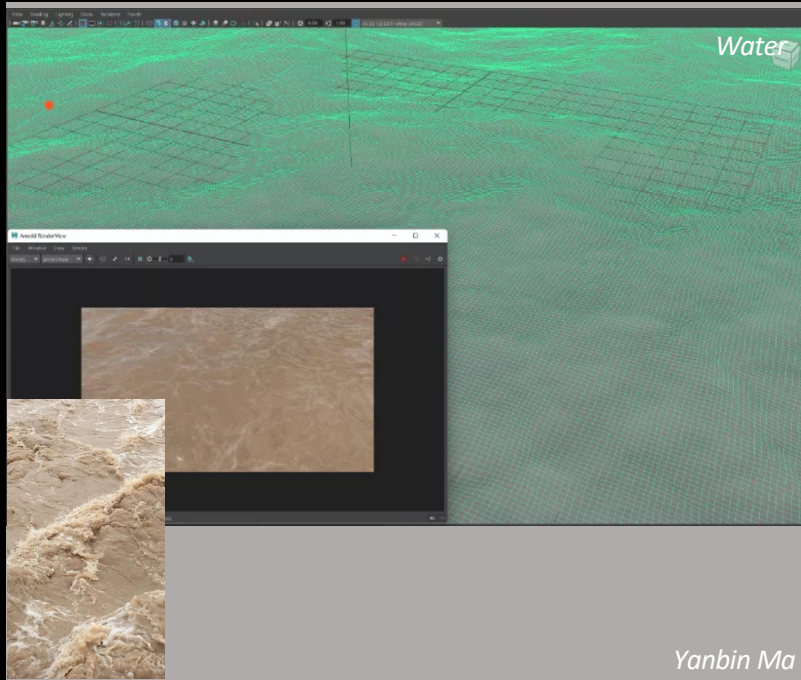

Maria Nira Gonzalez Sanchez

phone

The highlight of this old-fashioned phone is that it not only has a steampunk-style gear mechanism but also has a very modern midsole hollow design. It retains the classics and also has an extremely avant-garde design.

Lamp

This standing lamp is a combination made from the two reference images. It gives it that steampunk feeling through the structure of pipes going through the model. The design gives it that little edge due to the two gas meters that will be animated.
